

I am writing to let the FCC know that I do not want them to implemnt any proposal that would lessen Indiana's Telepone Privacy law protections. I did not believe that it would make much of a difference when I added our phone number to the list. Before calling the number to add our phone to the list we would get one telemarketer call every 10 minutes. It would start as early as 7 a.m. at our house since we do not change time in our county, and it would not stop until 9 p.m. That gets extremely anoying at dinner time when every 10 minutes the phone is ringing. After adding our phone to the list, we would only recieve one or two calls from telemarketers per week. That is a lot easier to deal with especially when you work at a reservations department and deal with the phone rining for an 8 - 10 hour shift. Please consider the people who have to acctually deal with all of the anoying phone calls when making your decision. Thank you for your time.
